(54) Title: METHOD TO DECODE A DATA STRING

(57) Abstract: The invention relates to decode data transmitted via US National Weather Service NOAA Weather Radio (NWR) transmitters or any other data transmitted in a comparable way. According to the invention a method to decode a received data string comprises the steps of locating a predefined significant part of the data string, disregarding an insignificant part of the data string, and further checking only the located significant part of the data string. Decoding according to the proposed algorithm is very reliable.
